Let's make it better together

GATE CLOSERS & ACCESS CONTROL

Discover our innovative solutions

HELLO!

Happy to know that you hold our new brochure in your hands. We are proud and excited at the same time to introduce you to our innovations.

We are constantly strengthening our position as the top brand in the gate and fence hardware industry. As a true expert in the field, we only aim for the best. Not only with the infamous locks and keeps, but in the fast growing segment of Automation & Electronics as well.

Our R&D team, which is in continuous expansion, has once again developed highly disruptive products which will shake the market. Always with our strict requirements in mind: superb product quality, fast & easy installation, unprecedented reliability, beautiful aesthetics and with added value for you and your clients.

Customer service remains to reinforce our healthy partnership. Our 24h shipment, with a 98% delivery rate on time, is maybe one of the best examples.

Sit back, relax and get inspired.
Happy exploring,

Mik Emmerechts
CEO Locinox

A COUPLE OF TIPS!

Most Locinox products are fitted with the patented Quick-Fix. This highly innovative and extremely strong anchor bolt resists a pulling force of 1000 kg per Quick-Fix.

Choose between many colours, whichever matches your gate best.

Most of our products are developed for left and right hand gates.

OUR PROMISES

INNOVATION

A motivated team of engineers and prototypers work hard on a daily basis to further expand the Locinox range with new products.

You can find many, pioneering innovations in this catalogue.

INDUSTRIAL QUALITY

Locinox products are of industrial quality. They are tested extensively by our Quality department in the most extreme circumstances.

We test every product a minimum of 500,000 movements before bringing it to the market. Locinox products extend the life of your gates and fences!

WEATHERPROOF

High quality materials and surface treatments ready for years of outdoor use are a basic requirement. This is why Locinox only uses stainless steel and non-ferro metals as raw materials for its products.

We choose chrome plating and, whenever possible, hot-dip galvanisation as surface treatment to maintain high standards. This way, our products have a longer life cycle than cheaper alternatives.

EASE OF INSTALLATION

"Time is money", you will most probably agree. This is why our products are designed as such that installation happens very quickly and easy.

Thanks to the special tools, the patented Quick-Fix and the Plug & Play design - installation happens in a blink of an eye.

The pre-fitted Quick-Fix solution guarantees a lightning fast installation. This way, the products are mounted very firmly.

MODULARITY

The products in our range are designed for maximum interchangeability. A multitude of combinations is possible to assure maximum flexibility according to your clients' needs.

Even after installation, our products can be easily adjusted and/or replaced.

CUSTOM ASSEMBLY

The modularity of our products allows you to choose from many different configurations. Locinox will assemble every possible configuration upon request.

Moreover, our well-organised logistics guarantee a shipment of our catalogue products within 24h after your order. This will allow you to react quickly to your clients' needs!

AT YOUR SERVICE!

Our sales team is easy to reach and will give you a prompt reply by phone or e-mail in no less than 7 supported languages.

They will supply you the correct product information and are happy to help you in choosing the right solution for the given situation.

Your orders are confirmed on the same day!

SELF-CLOSING HYDRAULIC GATE CLOSERS

1 ALWAYS A CONSTANT CLOSING SPEED FROM FREEZING WINTER TO SIZZLING SUMMER

If your gate closes too slow, children or pets could sneak through. If your gate closes too fast, it might become a problem for wheelchair users. A loud slamming gate is not only annoying for you or your neighbours, it's also harmful for your gates.

The Active Thermal System, our own cutting-edge development, guarantees a constant closing speed, regardless of the outside temperature.

2 ADJUST SPEED AND FINAL SNAP PRECISELY

Some customers prefer their gate to close slowly, while others want it to go a little faster. No problem! All of our hydraulic gate closers can easily be adjusted in a matter of seconds to the wishes of your customers.

The final snap allows the gate to speed up a little at the end: this way, you are reassured the gate is properly closed. The final snap can easily be adjusted to any need.

3 FUNCTIONS COMFORTABLY

The in-house developed High-Helix screws guarantee a consistent functionality and ensure a comfortable opening speed for the elderly or disabled.

4 DUST- & WATERPROOF

Our gate closers are equipped with rotary seals. These seals protect the gate closers from dirt and dust particles intruding the mechanism, assuring your customers of worry-free functioning for many years to come.

5 CLOSES EVERY TIME

The powerful torsion spring guarantees the necessary closing force. Therefore, your gate will always close: unaffected by strong winds, the width of your gate wing or the outside temperature. You can rest assured.

6 100% PROTECTED

The aluminium anodized housing guarantees full protection against any weather conditions. The housing is windproof, frost-free and dust- & waterproof, allowing your gate closer to function perfectly.

Ground fixation set for Interio gate closer

INTERIO-GROUND-9005

Optional set to fix the Interio gate closer directly on the ground. This set consists of a ground hinge and a wall panel. Including all fixations.

Specifications

- ✓ Wall plate made of hot-dip galvanized metal with RAL9005 powder coating
- ✓ Bottom hinge fixation block made of aluminium
- ✓ Anchor bolts included
- ✓ Distance between gate and wall: min. 29 mm - max. 54 mm
- ✓ Depth adjustment: 15 mm
- ✓ Height adjustment: 10 mm
- ✓ Minimal opening under the gate: 55 mm
- ✓ Only compatible with Interio gate closer

ACCESS CONTROL

The SlimStone-2 keypad with two integrated relays sets the new standard! With an IP 68 value SlimStone is designed to smoothly endure the most extreme weather conditions. Moreover, the Smart Heating System guarantees a frost-free and perfectly working keypad during winter time.

SlimStone-2 can monitor all Locinox access control products, as for example the surface mounted Modulec electric strike or our range of magnetic locks. Locinox automation products also fit this range. A quick and efficient installation ensures comfort and peace of mind.

MODULEC-SH-R Fail Open for surface mounted gate locks, 12-24V AC/DC

VINCI - Surface mounted mechanical code lock

LMKQ V2 (Patented)

High quality mechanical code lock with aluminium housing and stainless steel mechanism. The Vinci requires no batteries nor electricity, which makes it very easy to equip any gate with access control. The 20 mm continuous adjustability of the bolts allows a perfect latching / locking of the mechanism. A solid stainless steel deadbolt with a 23 mm throw guarantees a secure locking. For a fast and highly precise installation, we recommend using the Drill-Fix drilling jig.

Lockbox color options

ZILV 6005 9005 7016

Specifications

- ✓ ISO 9227 KTL / E-coated lock box withstands 1000 hours of salt spray test
- ✓ Mechanical code panel on both sides
- ✓ Possibility to work with different entrance and exit codes
- ✓ Polyamide rain and dust cover
- ✓ Easy and fast set-up or modification of the access codes
- ✓ With adjustable rollerbolt for easy closing
- ✓ Extremely strong and user-friendly mechanism
- ✓ Automatic code reset after pushing the handle
- ✓ Anti-code detection with integrated security press plate
- ✓ Interchangeable with all Locinox locks

Integrated magnet lock for swing gates

B-MAG-

Thanks to its assembly in the pole, this magnet lock can be installed invisibly and aesthetically, whilst maximal passage space is maintained. A quick assembly is done with Quick-Fix. It has a guaranteed tensile strength of 250 kg and resists to extreme weather conditions. The rubber bumpers prevent shaking of the gate, and damage to the gate and its accessories in case of harsh handling, and the flexible assembly of the armature plate guarantees a good closing even if the gate isn't perfectly aligned.
