

HAUTAU Move

SIMPLY **CONVINCING**

Move – the sliding solution Drill, insert, screw in

Move – this is the clever slide hardware from HAUTAU. A super-simple and fast assembly makes it a unique solution that boasts a huge tolerance compensation. The free choice of handle position and the possibility to build special formats are convincing. In addition, Move allows the implementation of inexpensive sliding elements that are ideally suited for series production.

And your customers? These benefit from a sliding door with very good, standardised weather seals and low sliding effort for easy operation.

Move

Variant for PVC

Drill, insert, screw in - the Move hardware is mounted quickly and easily with standard tools. The complete system, in combination with the MACO Multi-Matic turn&tilt hardware and the intelligent safety roller pin, ensures completely sealed and series production ready sliding elements. The central lock can be directly assembled in the sash groove.

Another advantage is the separation of the roller from the central lock system, so the effort required during opening and closing is reduced. Finally, the central lock can be freely designed which allows special formats as well as the handle position on all four sash sides.

HANDLE

Free handle position due to free design of the central lock
- incorrect operation avoided

STRIKER PLATE

Clampable striker plate with secured night ventilation

CENTRE LOCK

Large tolerance compensation (+/- 5 mm)

ROLLERS

Independent of the central lock
- high operating comfort due to low effort

Assembly **Central lock**

An unbeatable advantage

Fast, easy, clean and without additional profiles. This is how the assembly of the central lock works with Move – directly in the fitting groove.

Move slide hardware you will like it ...

- › Install the slide hardware and the turn&tilt hardware Multi-Matic with standard tools (tolerance compensation: +/- 5 mm).
- › For easy and fast assembly! Implement special formats thanks to the free design of the central lock and freely position the handle.
- › Thanks to positive control, you can sell perfectly sealed sliding elements with a circumferential seal in a specially developed profile.
- › Benefit from new market opportunities thanks to attractive slide solutions, as the overall system is excellently suited for commercial construction. Series ready production - the complete system is the ideal solution.

Delivered window sill?
No problem thanks to HAUTAU Move and its space-saving parallel stop.

... and your customers

- › The simple operation, intuitive for the whole family, excludes incorrect operation and requires only low operating effort.
- › The space-saving parallel stop enables ventilation despite the window sill being pre-delivered.
- › The secured night ventilation position provides protection against unwanted lifting of the sash and simplifies ventilation.
- › Is the space in the masonry limited? Then special formats are the solution.
- › The slide element remains tight throughout its entire service life.
- › For architects - the Move system provides a cost-effective slide window for public tenders (e.g. hospitals, social housing, hotels, schools ...)

Searching for a
commercial solution?

The answer is Move!
