MACO RUSTICO

SHUTTER FITTINGS

Protection that creates a special atmosphere

**MACO
RUSTICO**

The window shutter is an identifying feature of a house – a characteristic that in many areas typifies the appearance of entire localities. For many people, it is an attractive building accessory.

The folding shutter can, however, do considerably more than just look good. It provides protection against rain, hail, sunshine, snow and the cold, from inquisitive gazes and it makes life difficult for burglars.

**Window shutters radiate intimacy and
exude homeliness!**

**MACO
RUSTICO**

Protection that creates a special atmosphere

Feel Safety Security and Sociability

It is not the appearance alone that is making the use of window shutters more popular.

The recognition of their function as a decorative, insulating and security element is also raising their importance.

Window shutters are therefore being fitted ever more frequently to both restored houses and new dwellings

MACO-RUSTICO-Shutter fittings stands for: secure – convenient – durable

Window shutters must be equipped with secure and easy-to-operate fittings, which will ensure years of trouble-free operation.

MACO-RUSTICO-Shutter fittings are:

Secure

- Because pivots are generally made from steel.
- Because the size of the brackets provides additional stability.
- Because special screws are fitted so that it is impossible to take the shutters apart.

Convenient

- Because all operating devices are easy to get at and to use.

**MACO
RUSTICO**

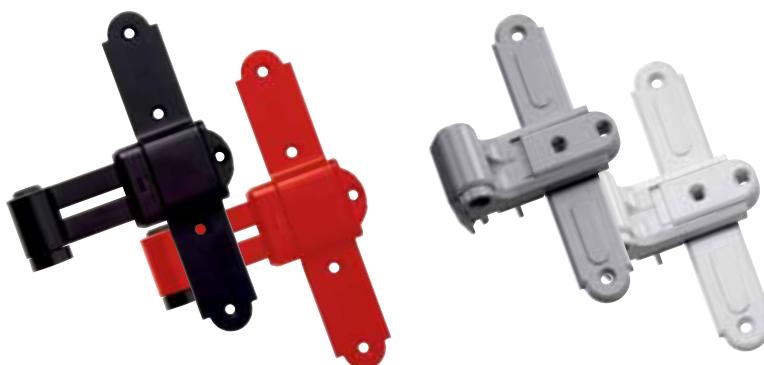

Innovative surface technology for your shutter fittings

- Highly resistant to corrosion – MACO provides a 10-year guarantee
- Also suitable for coastal regions
- Refined, finely-textured aesthetics, resistant to UV light
- Water/dirt-repellent properties
- High resistance to scratching

Blends ideally with all surfaces and types of shutters

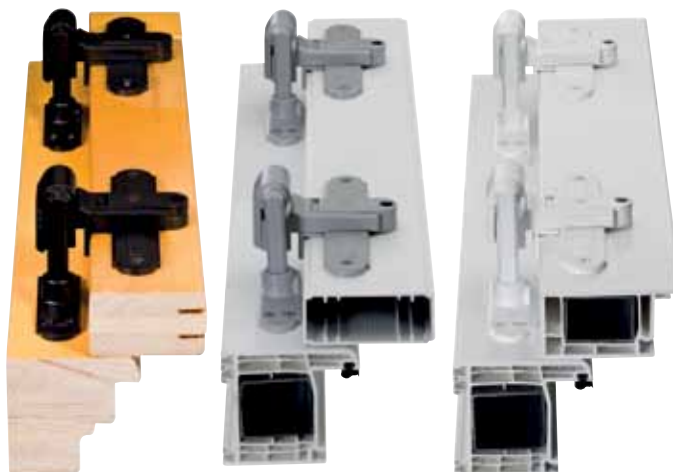

- Select from three standard colours (black, grey, white), as well as RAL colours on customer request
- Environmentally friendly as no solvents are used

Many possible uses and easy handling

Hinges for all types of shutter

- For timber, PVC, aluminium and GRP shutters
- Solutions for frame mounting
- Suitable for all shutter designs
- Extra narrow brackets for low clearances between the wall and the shutter

Simple and easy

Simple . . .

➡ . . . because shutters can be laterally adjusted retrospectively.

➡ . . . because offset adjustment is possible with the shutter open or closed.

With a built in scale to aid adjustment.

Easy . . .

. . . because the shutter is easy to hang thanks to the synthetic bush.

. . . because the synthetic bush prevents the pivot against corrosion. Shutters move freely for years.

Security knows no bounds

RUSTICO-Pivots

Stable and secure

- Pivots are generally made of steel
- The patented shutter pin lock protects the shutter pin against installation errors
- High stability due to 55 mm high mounting brackets
- Pivots are screwed from the side, therefore they are inaccessible when the shutter is closed

RUSTICO-Anti-removal device

- Can be fitted after installation.
- Safeguards the shutter in both the closed and open position (wind).
- The safety device cannot be removed in the closed position.

Additional safety screws

"one-way screw"

- Specially matched safety screws make removing the shutter fittings impossible by conventional means.
- The "one-way screw" cannot be removed.

Innovative solutions are what motivate us

RUSTICO-Comfort shutter stay

Easy and convenient

- No protruding parts when the shutter is open.
- Easy operation.
- Hardly visible.
- Only one size needed.
- Stable, particularly with heavy shutters.
- Can be used independently of fittings.

RUSTICO-“Classic” shutter stay

Many options

- Shutter latches automatically.
- Can be adapted to any thickness of shutter.
- Steel fixing bolt for different types of walls, also for insulation up to 315 mm
- Fixing bolt thermally broken for different types of walls with insulation up to 160 mm

Shutter stay for doors

- Shutter engages automatically when opened.

**MACO
RUSTICO**

The height of convenience

RUSTICO-internally-operated shutter opener

Deal solution for windows with fixed glazing, sliding windows or horizontally pivoted windows.

Convenient to use

- Shutters can be opened when the window is closed.
- Removable handle makes it safer for children

RUSTICO holding latch

Child's play to use

- Shutter engages automatically when opened.
- Easily accessible and recognisable operating device.

Buffer stop soft

- Serves as protection and compensates for offset; it is available with 5-mm and 10-mm stackable packers

State-of-the-art locking

RUSTICO-Spring catch

- Suitable for left or right handed applications.
- Operating device is smooth and easily accessible.
- Can be used in any situation (with slats in front or with windows with mullions).

Locking pin plates for all applications.

RUSTICO-2-F rod-operated lock

For single and multi-casement shutters . . .

. . . with Night vent position.

**MACO
RUSTICO**

Functionality to the fore

RUSTICO-shutter centre lock, dual casement

- Suitable for left or right handed applications.
- Night vent position.

RUSTICO-shutter centre lock, single casement
